LAMINATE FLOORING

TRENDS: Creating your own space

We live in a constantly evolving society, where trends become true indicators of social and cultural changes. This influences how we perceive our environment, as well as our consumption and interactions.

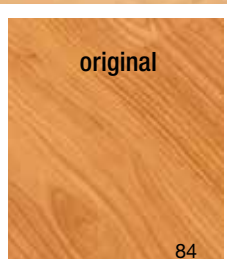

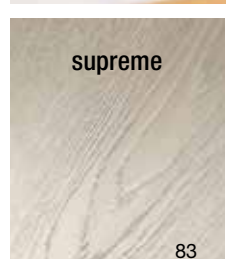

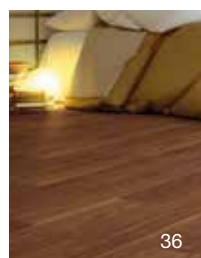

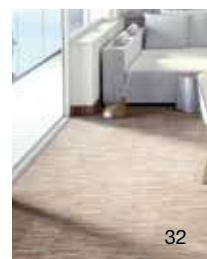

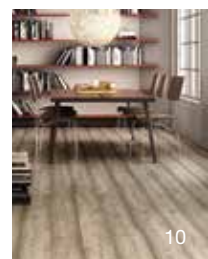

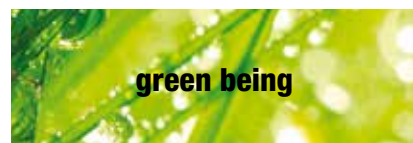

Society and the acquired habits outline our needs and desires, and directly influence our way of life. This transformative force also directly affects the creation and finishing of our homes. Trends, ultimately help us define principles and

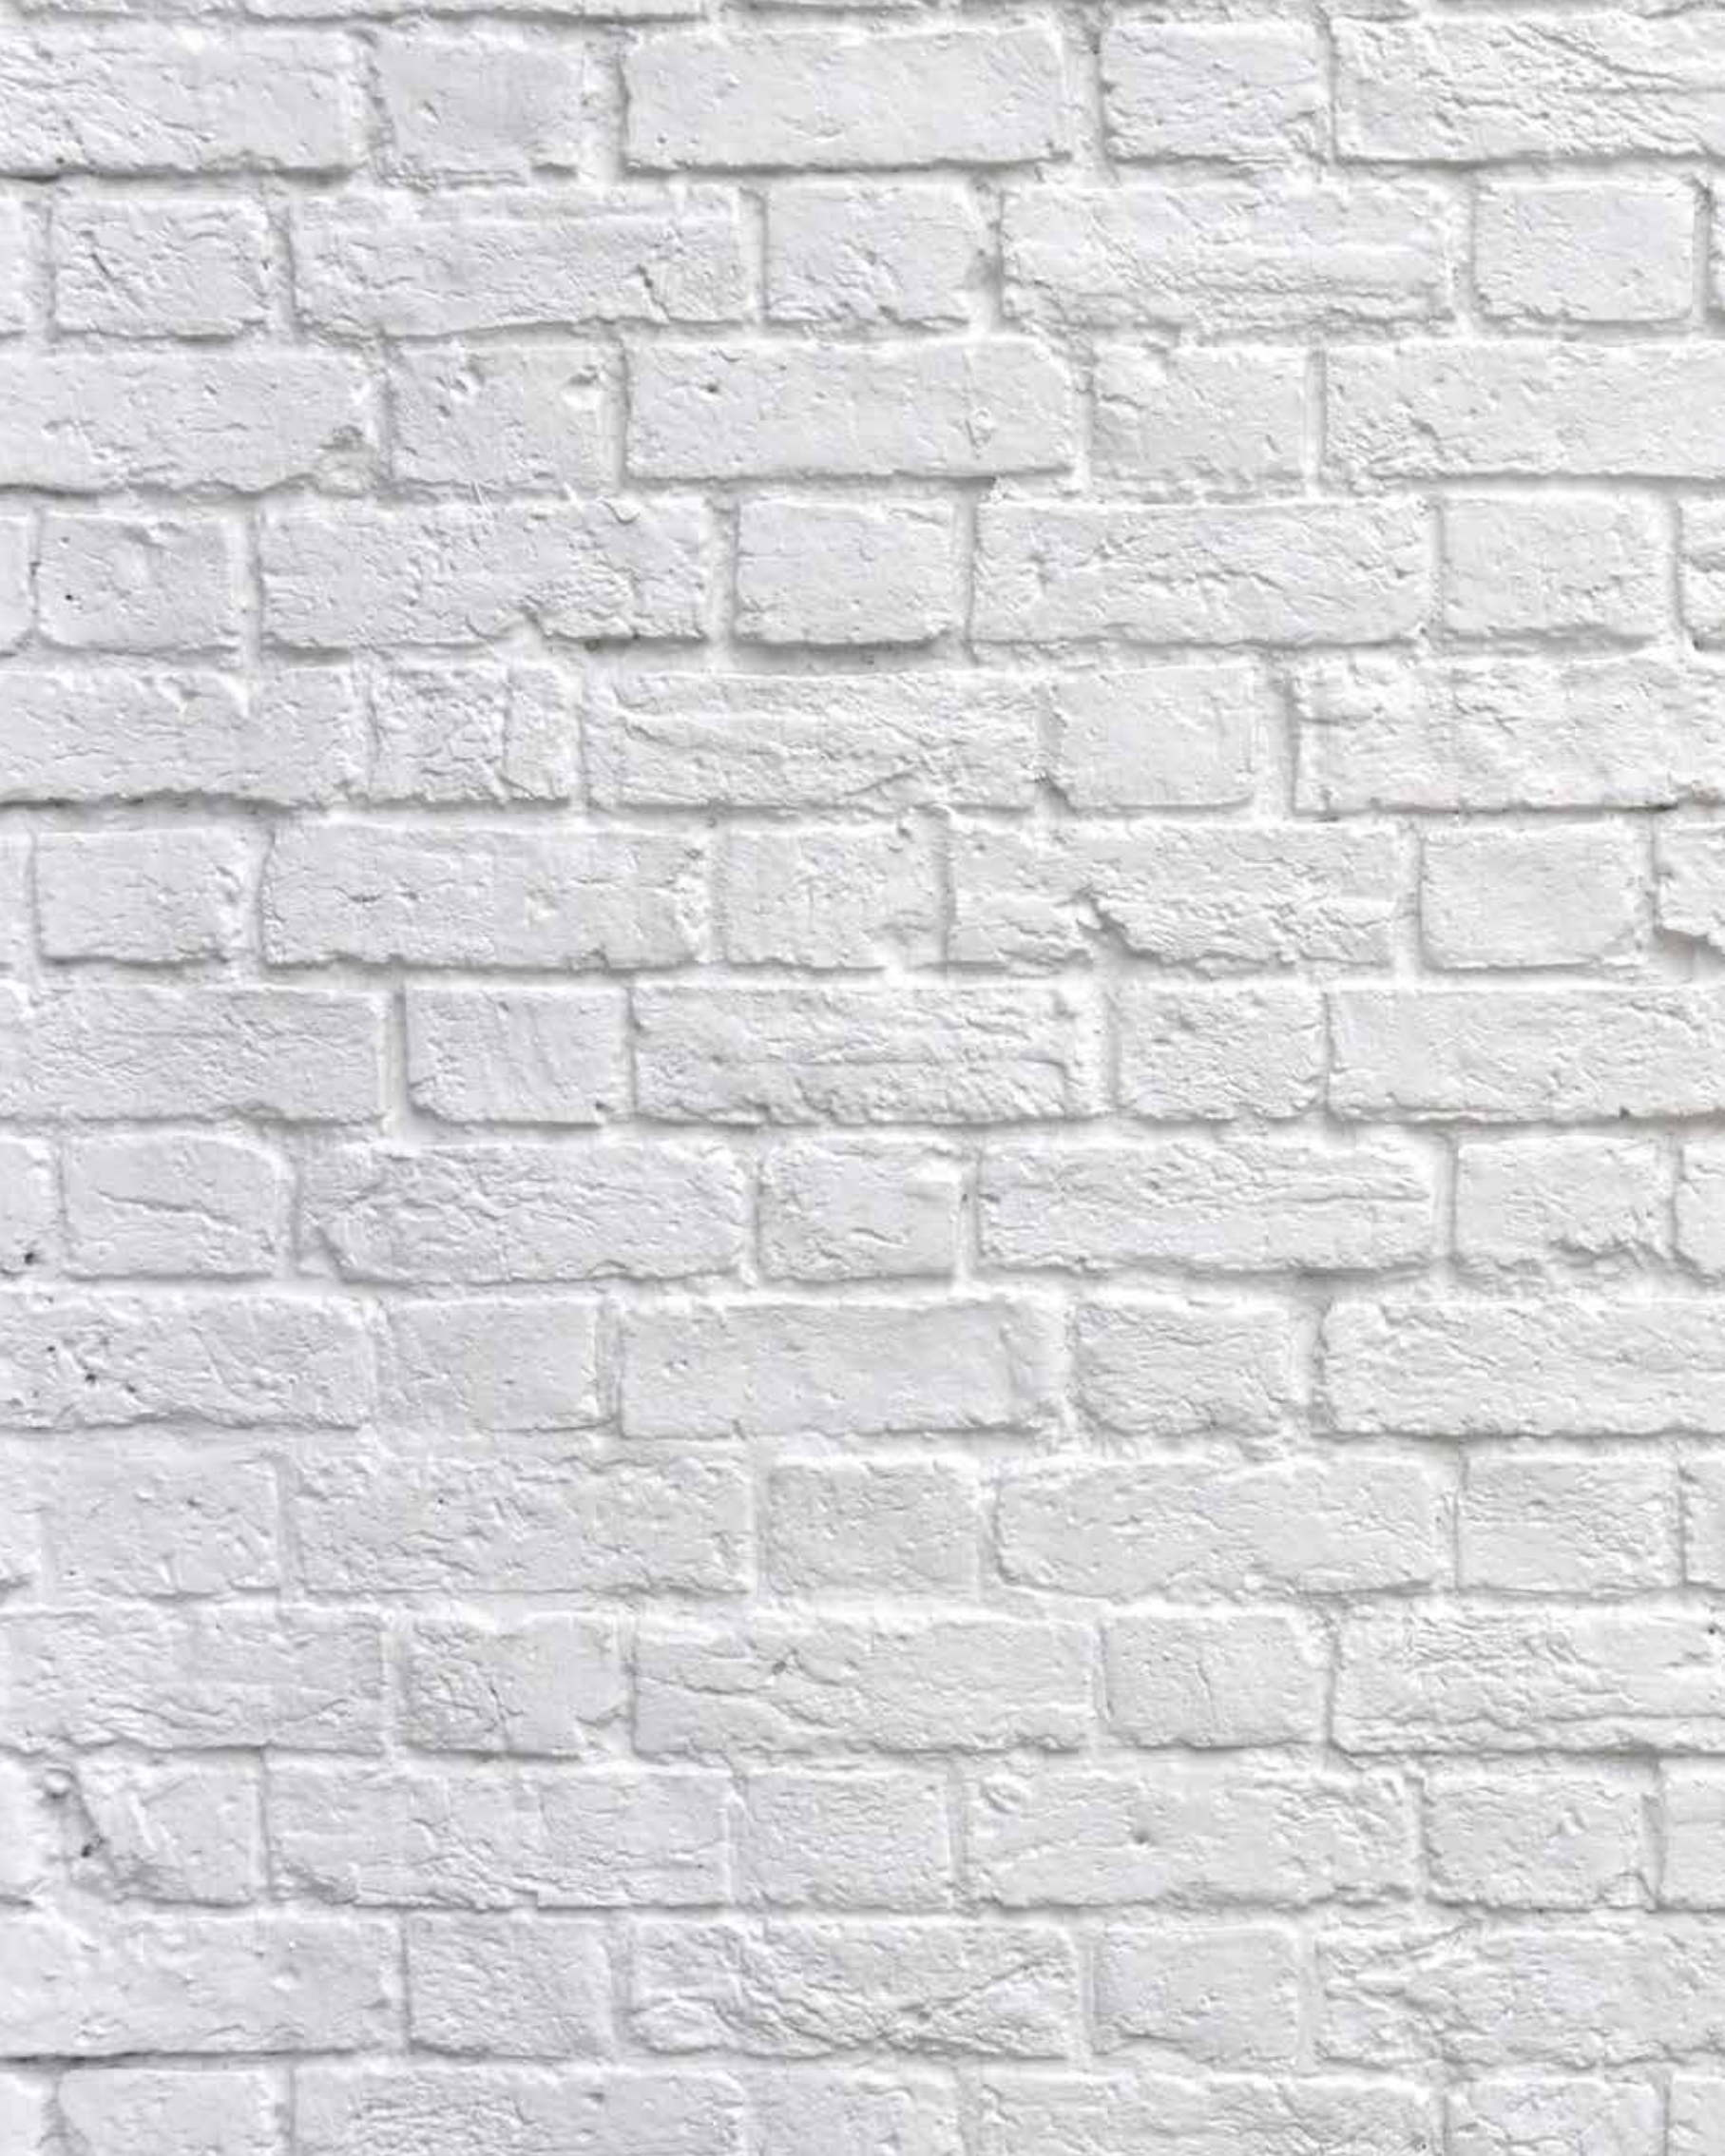

tastes that we all share, and that each one of us adapts and combines to create our own style. This catalogue is intended as an inspiration guide, based on the decorative solutions offered by FINFLOOR laminate flooring.

The floor is the undisputed protagonist in any interior design project. It provides character and personality to the environment. Therefore, it is the common element in our journey through different styles.

To make your choices easier, we have grouped the trends being offered under the topics INDUSTRIAL & RAW, HIDDEN LUXURY, GREEN BEING and VINTAGE ATTITUDE. We invite you to discover them all, and hope they can be useful tools to help meet your decorative needs. A starting point for creating unique environments, the beginning of your own space...

INDEX

industrial & raw

Trends: Economic development has turned consumption into a negative concept. For this reason, we claim what is simple; searching for the basics... In this context, the taste for rehabilitated industrial environments takes a leading role.

Spaces: The industrial trend is especially reflected in public or contract spaces, and can be seen in the decoration of shops and storefronts. It is associated with urban environments, of controlled well-studied chaos, and revolves around the taste for an industrial unfinished look. It emphasizes loft, garage, workshop or warehouse environments; or else these original spaces are refurbished for other purposes, recovering industrial elements applied to decoration.

Materials: It emphasizes plain materials: cement, lumber, metal, rust, wear, primitive, essential, basic, raw... imperfection is considered an asset. The key to this trend is the use of "raw materials" in their purest form: untreated surfaces, bare products with nothing added.

Recreating aspects of naturalness and wear, the design and finishing replicates sawn lumber, thanks to the Saw-Cut effect.

Original columbia oak / **industrial & raw**

The longitudinal grooved variants or on four sides of the design, like the Columbia Oak, help extend the space. Details that contribute towards creating larger spaces.

Original bromo oak / industrial & raw

TITANIO OAK

TAUPE OAK

CALCIC OAK

BABYLON GREY

Grey for any occasion:

With Finfloor you will find a wide variety of grey tones, either light or heavy, cold or warm. This tone, with clear industrial traces, allows the combination or contrast with the decor of the space.

Original olimpo oak / industrial & raw

Original halti ash / industrial & raw

hidden luxury

Trends: In Hidden Luxury, luxury is not understood as ostentatious, but rather as the taste for products, experiences and environments that evoke “quality” as the main value. Beauty can be found in the austerity of simple lines. Thus, we understand luxury as translated into quality and excellent design, highlighting the justified value of objects. These features result in differentiation: the design and functionality of furniture or objects are key to establishing such differences. Hidden Luxury is able to democratize luxury, allowing it to be accessed by a more diverse audience that values the concept of enjoyment more than that of possession.

Spaces: The more austere and sober elegance comes from simple lines, although provided with details and nuances. We understand luxury as authenticity and style, and much less like fashion. Discover the timeless aesthetic, and take shelter in classic lines.

Materials: glitter, metallic, smoky woods, timelessness... high value nuanced essences, based on simplicity and elegance.

Supreme alpine gaia oak / **hidden luxury**

Style naomi walnut / **hidden luxury**

Style breno oak / **hidden luxury**

green being

Trends: It represents a philosophy of life. It is inspired by an awareness of environmental conservation, by a search for balance and well-being, based on eco-responsible behaviour. We focus our efforts on sustainability and rationality of all actions that make up the day-to-day and the environment. Emphasizing nature in its purest form, we reinforce concepts such as recyclability and sustainability, key for this type of environments. This trend represents wellbeing without excess, how to return to a less ostentatious and more rewarding lifestyle.

Spaces: The environments reflect the concern for the environment and balance. There is a quest for sustainability, which is conveyed through feelings of comfort, warmth, and that reflect the changes that occur in society. The habitats chosen are more consistent with environmental conservation.

Materials: We provide naturalness, warmth, softness... we propose neutral tones, light wood, fresh and pleasant textiles...

Original arabian strips / green being

Style light sovereign oak / **green being**

Achieved reality. Wood and texture are matched through the synchronized finishing “Wood Impression”. Thus, the realism achieved makes it difficult to distinguish it from the original natural material.

Original siddhartha walnut / **green being**

Advantages "Natur-Rich." We combine different areas of the same type of wood and / or different gradations of tone between wood planks. Thus, once the floor is installed, this balanced variety becomes the absolute protagonist of any environment.

Style golden guadiana / **green being**

Eucalyptus wood is a type of material that honours the design and development of any environment. Thanks to the variety of its planks and natural tones, it is a decorative tool that can meet the needs of the most demanding targets.

Original chic oak / green being

Style artic sovereign oak / **green being**

vintage attitude

Trends: We were inspired by a look into the past, which we interpreted for you in two different ways:

- Nostalgia: recovery of items with a sentimental value, which have undergone the passage of time, and that reflect it on their exterior. In any case, objects with a past. Elements that convey memories, experiences, delicacy, tenderness...
- Inspiration: We adopt styles and techniques from the past, but enhanced by technology or perfectly adapted to the aesthetic requirements of the present.

Spaces: They convey an environment of romance and nostalgia, they tell a story, and have an emotional component filled with memories. We seek a retro, although updated, inspiration that reminds us of the Nordic style.

Materials: We use either old, renovated or new materials, but always functional. Retro rustic-looking wood with crowns, and very colourful.

Style scottish oak / **vintage attitude**

While emphasizing the constant search for naturalness and for the actual appearance of wood, we use matte Dry-Touch texture. This texture endows the design with a “raw” wood appearance, without treatment, which we want in order to recreate beautiful natural environments.

Style drift wood / vintage attitude

Original retro oak / vintage attitude

Style smoked oak / **vintage attitude**

To increase the visual contrast in each environment, the choice for smoky tones is ideal. These shades are perfect for highlighting the contrast with the remaining decorative elements of the scene.

Original patina / vintage attitude

Original ural oak / **vintage attitude**

Original taupe oak / **vintage attitude**

benefits

discover for yourself the advantages of decorating your home with Finfloor

The speed at which needs and trends evolve in decoration is answered by the wide range of product features presented by FINFLOOR through this catalogue.

A range of possibilities, tones, contrasts, wood grains... different styles for different lifestyles. While emphasizing quality, we present a product with many advantages.

Both for the qualities of its installation techniques, as well as for its durability, respect for the environment, maintenance, etc, and for the beauty of its floors, FINFLOOR becomes the best option to make each of your projects come true, regardless of the space you want to create or refurbish.

SUSTAINABILITY

Wood as a sustainable, renewable and recyclable raw material.

PEFC
Sustainable forest management

EFFICIENT
FINfloor, suitable to be used with radiant heating systems.

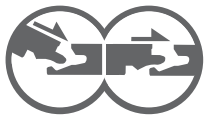

EPD
A certificate that quantifies the impact upon the environment of the full life cycle of a product. Our wood-based solutions contribute to the capture of greenhouse gases. 1m3 of MDF/ DM takes away 818 kg of CO2.

benefits **FINfloor**

INST ALL ATION

Practical, clean and instantaneous.

QUICK

The most versatile and comfortable “click” system on the market.

Angle or flat installation.

Sealed edges for easy sliding.

FLOATING

FINfloor is the most convenient solution for refurbishments.

No need to remove the previous flooring (except textiles).

DRY

No glues, cements or varnishes.

No waiting times after installation.

MAINTENANCE

**Immediate use, no waiting time.
Finishing resistant to stains and dirt.**

EASY TO CLEAN

With a simple broom or vacuum cleaner.

HYGIENIC

Non-porous surface.

NO VARNISHES

FINfloor does not need any polishing or re-varnishing

↓

finishing works

Each type of wood gets the ideal type of finishing work to enhances its identity, to convey the maximum naturalness.

Nature

Fine and elegant pore, with medium-high brightness, can replicate the effect of newly varnished wood.

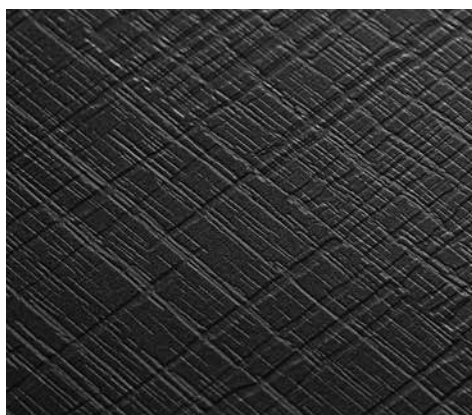

Dry-touch

Matte-like finishing providing a rough texture, like raw unvarnished wood.

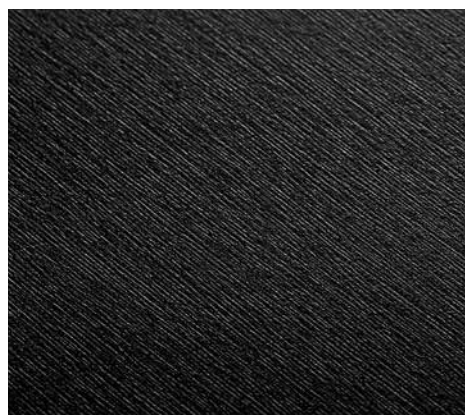

Wood-touch

This rough-touch finishing provides a strong character to design, while providing a medium-high gloss level.

Saw cut

Balanced combination of two levels of brightness that replicate the classic grooves of sawn lumber.

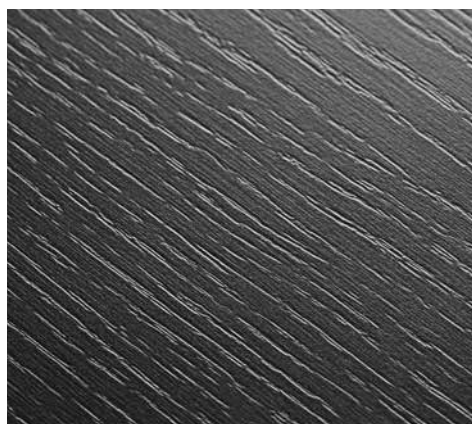

Matt-oil

Extramatte closed pore finishing, replicating the effect of overprint varnishes.

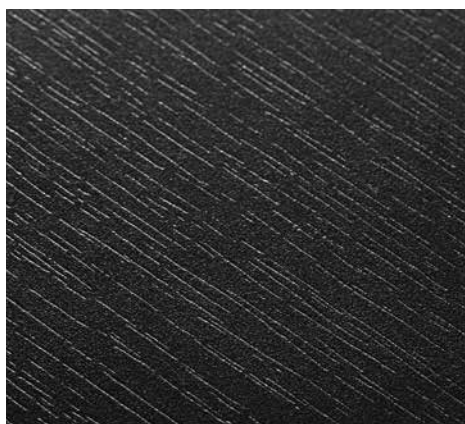

Wood impression

Synchronized texture and design, faithful replication of original materials. Collection Sovereign Oak, Luxury Walnut and Gaia Oak.

Rustic pore

Irregular discontinuous wood grain, and brightness enhancing its natural tone.

Poro Flooring

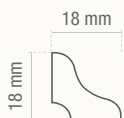

Harmonized classic wooden pore, with a glossy appearance.

No Insulation PE Underlay TWIN Underlay SILENT Underlay

5 TRANSMITTED NOISE

-0 dB -14 dB -18 dB -20 dB

No Insulation Required Minimum Required Recommended SILENT PE TWIN Underlays

6 RADIANT HEATING

Thermal conductivity:
FINfloor-SILENT Underlay
TR: < 0,15 m² K/W

ENSURING THE DURABILITY OF THE FLOOR:

- ❶ The plastic film built into FINfloor underlays protects the laminate flooring against moisture or condensation from beneath
- ❷ Extend the optimal joints condition by using an underlay with high resistance to loads and foot traffic.
FINfloor underlays make up for small irregularities and uneven ground up to 2mm / l.m.

OPTIMIZE THE FEELING OF COMFORT

- ❸ TWIN and PE underlays help reduce energy expenditures thanks to their thermal insulation function.
- ❹ Get a quieter and more pleasant treading sound by using the SILENT underlay.
- ❺ Any of the FINfloor underlays minimizes the noise conveyed to the floor below.
- ❻ The SILENT underlay is the certified solution for application with radiant heating or cooling systems with water. Its low thermal resistance (TR) enables optimal heat transfer.
